

AVANT[®] 200

Super compact multi-function loader

- ✓ Amazing power and versatility in a very compact package
- ✓ Wide range of attachments available for year-round use

Avant 200 series is an amazingly powerful and versatile compact loader considering its small size. The basic articulated design and hydraulic 4x4 transmission is the same as in bigger Avants.

Easy access to driver's seat, ample space for operator, logical and easy-to-use controls and excellent visibility to the working area guarantee efficient operation. Avant quick attach system for attachments and hydraulic multi connector are standard features as well.

Avant 200 series is very easy to operate. Its compact size and maneuverability enable endless possibilities in small spaces, for instance on the yard and in the garden. Since the loader is easy to transport on a trailer, you can effortlessly relocate it wherever it is needed.

The wide Avant attachment range allows working all year round – be it earthmoving, lawn mowing, digging, load handling, snow removal etc. 200 series is much more than a ride-on lawn mower, compact tractor or a quad bike.
